Quick Actions

- **Restart IoT Gateway** — Clears cache for all sensors in Zone A.
- **Push Over-the-Air Update** — Deliver firmware v2.4.1 to nodes.
- **Snapshot Report** — Download current status as CSV.
- **Emergency Override** — Set all gates to open status.

Management Forms Library

Unified administrative data entry library for the Smart Parking Slot Optimizer. Manage zones, slots, sensors, tariffs, and active sessions.

Add New Parking Zone

Define a specific area or floor within a parking lot.

Zone Name: e.g. VIP Section A
Parking Lot: Downtown Plaza Garage
Floor Level: 0
Description: Details about zone access or vehicle types...

Cancel | Save Zone

Add Parking Slot

Configure individual parking spaces and sensor linkage.

Slot Code: e.g. A-102
Slot Type: Regular
Initial Status: Available
Parking Zone: Ground Floor - A
Linked Sensor (Optional): None / Auto-detect

☐ Allow "Assign Best Slot" algorithm to prioritize this slot

Cancel | Save Slot

Register Hardware Sensor

Add IoT devices for occupancy tracking.

Sensor Code / UID: e.g. SENS-X-99
Hardware Type: Ultrasonic Distance

Active Status — Is the sensor currently transmitting data? (toggle)

Initial Linked Slot (Optional): Unassigned
Installation Notes: Location details, mounting height, IP address...

Cancel | Register Sensor

Create Tariff Plan

Configure pricing rules and grace periods.

Plan Name: e.g. Weekend Special Rates
Hourly Rate ($): 4.50
Daily Maximum ($): 25.00
Grace Period (Mins): 15
Effective Date: 2024-06-01
Applies To Scope: Entire System

Cancel | Save Plan

Manual Session Entry

Manually start a parking session for a vehicle.

Vehicle Plate Number: ABC-1234 Detected
Parking Allocation: A-102 (Occupied) — Auto-assign
Conflict: Slot A-102 is currently marked OCCUPIED by Sensor S-88.
Apply Tariff: Standard Hourly Plan
Vehicle Category: Sedan / Hatchback
Entry Timestamp: 2024-05-24T14:30
Session Notes: Oversized vehicle, special request...

Cancel | Create Session

Bulk Import Infrastructure

Upload a CSV file to import multiple Slots, Zones, or Sensors at once.

Click or drag CSV file
Max file size: 5MB

Download Template (.csv) Delimiter: Auto-detected (Comma)

VALIDATION ERRORS (3)
- Row 4: zoneCode "Z-99" does not exist.
- Row 7: slotType "LIMO" is not a valid enum.
- Row 9: sensorUID duplicate detected.

Data Preview (First 10 Rows)

#	Slot Code	Type	Zone	Status
1	A-201	REGULAR	Ground Floor	✓
4	A-204	EV	Z-99	!
5	A-205	REGULAR	Ground Floor	✓

Dry-run only (Simulate import without saving)

Cancel | Validate Again | Import Verified Records

Process Session Payment

Finalize billing for session **SES-4491-X**

Session ID: SES-4491-X
Final Amount: $ 18.50

Payment Method: Card | Cash | External

Card Details: **** **** **** 4421
Expiry: 08/26
CVC: ***

Payment Status: Authorized — Credit card balance verified. Ready
